## SHRIMP FISHERY TO RE-OPEN OFF TEXAS ON JULY 15, 2007

NOAA Fisheries Service announces federal waters from 9 to 200 nautical miles off Texas will open to shrimp trawling at 30 minutes after official sunset, local time, on **July 15, 2007**, corresponding to the time Texas opens its waters to shrimp trawling.

The shrimp fishery is closed annually off Texas to allow brown shrimp to reach a larger and more valuable size prior to harvest, and to prevent waste of brown shrimp that might otherwise be discarded due to their small size.

The Texas closure in federal waters ranges from 45 to 90 days. The closing and/or opening dates of the Texas closure are based on the results of biological sampling by the Texas Parks and Wildlife Department (TPWD). NOAA Fisheries Service

opens federal waters off Texas when the state of Texas opens its territorial waters. Texas opens state waters based on projections of when the mean size of brown shrimp leaving the estuaries is 112 mm total length, during a period of maximum duration ebb tides. TPWD has projected the criteria to end the Texas closure will be met on July 15 this year.

### How Can We Improve These Fishery Bulletins?

If you have any suggestions on how we may improve the contents of future fishery bulletins please contact:
