Note: Landings include data from MRIP or MRFSS calibrated to MRIP, headboat, and LA Creel for all of 2016. TPWD data is available from January through May 14, 2016. Greater amberjack and gag landings exclude Monroe County, Florida. November/December MRFSS landings from the SEFSC are not available at this time therefore MRIP landings were used for gray triggerfish for November/December landings.

¹Sources: SEFSC MRIP-Based Recreational ACL Data (MRIP, SRHS Waves 1-6, TPWD Waves 1-2). LA Creel. Note: TPWD data for Waves 3-6 not presently available. TPWD (Wave 3-6, 2015) landings were 209,665 lbs. Thus, the ACL will almost certainly be exceeded in 2016 once these data are available. Charter landings outside the federal season are included against the Private angler component data.
