

Sean P. Powers was raised in New Orleans, LA where he attended Loyola University (BS with Honors) and the University of New Orleans (MS). He received his Ph.D. in Zoology with a special emphasis in Biostatistics from Texas A&M University in 1997. Following a Dean John Knauss Marine Policy Fellowship at the National Science Foundation (1997-1998) and a post-doc at the University of North Carolina at Chapel Hill (1999-2002), he joined the faculty in the Department of Marine Sciences, University of South Alabama and the Dauphin Island Sea Lab (2003). He is currently a Professor of Marine Sciences at USA and a Senior Marine Scientist III at the Shelby Center for Ecosystem Based Fisheries Management at the Dauphin Island Sea Lab.

The majority of his research is focused on demersal fishes and benthic invertebrates in coastal and estuarine systems, particularly those that support commercial and recreational fisheries. The ultimate goal of the research program is to provide scientifically sound information to direct conservation and restoration efforts of marine fisheries and habitats.

He has published 60 peer-reviewed articles in journals including *Science*, *Ecology*, *Limnology & Oceanography* and *Marine Ecology Progress Series*. His research program has generated over 15 million dollars in extramural support from federal and state agencies including the National Science Foundation, National Marine Fisheries Service and SeaGrant. He has also mentored numerous graduate students and undergraduates during his career at the University of South Alabama, Dauphin Island Sea Lab, and University of North Carolina.
