**Category:** Charterboat, AP-Red Snapper

***Charlene--please post this***

***If the commercial guys have too many fish we damn sure don't need to lease them . The fish are a public resource. Why isn't the public getting paid for the 4.65 million pounds they were originally gifted? These fish belong to the public –period. Not to the commercial sector to lease back to the general public. How far off base can you people actually get?***

***Thanks,***
